

Strategy and Origination Manager

Permanent

Location: Selby/London/Hybrid

Climate change is the defining issue of our time. Do you want to make a difference and meaningfully contribute to the challenge of getting the world to net zero?

Are you looking to excel your career within Fibre Forestry and Sustainability? Are you a visionary within leadership and strategy, regardless of Industry?

Here at Drax, we're aiming to be a global leader in negative emissions through BECCS – bioenergy with carbon capture and storage – and we're looking for talented people to join us to help develop this essential carbon dioxide (CO₂) removal technology and make a real difference in the fight against climate change

As the Strategy and Origination Manager, you'll lead the development of both project fibre strategies and basin-wide sourcing strategies, integrating across the team, ensuring alignment with group fibre and specific project development requirements.

This is permanent role, and you can be based anywhere in the UK. You will be assigned to a contractual location, Selby or London and you will manage your diary to reflect where you need to be and when. Hybrid working with travel across the UK as well as internationally

About the role

You'll lead the research and analysis of sourcing landscape for specific fuels and basin geographies (policy agenda, markets, industries, key players, infrastructure capability).

This will also include leading the identification, appraisal and early development of new fuel supply chains within target sourcing basins.

With your strategic experience you'll formulate the optimal strategy for supply chain development (e.g., phasing, form/specification, commercial model, supply chain insertion, enabling capital).

Integrating across project/asset teams, you'll implement the plan for supply chain appraisal/development, leading the analytical scope, managing external studies and interfaces.

Critically, you'll facilitate and support handover to commercial team for execution and onward management.

About you

Ideally, you'll be chartered or working towards chartered status or hold a Professional membership of the Institute of Chartered Foresters or another relevant professional body

You'll work within a similar role, within an industry that could be Fibre, Forestry, Sustainability, Oil and Gas or Alternative Fuels (for example)

You'll demonstrate your experience of strategical planning and critical commercial negotiations – of high value, with high success

We want your creativity, your inquisitive mind, the ability to think of solutions that can sometimes be out of the box! You'll be driven and be passionate to really make a difference to not only BECCS within Drax – but also Climate Change

You'll be collaborative, engaging, thrive in building relationships and essentially, but an inspiring collaborator to your team and the wider world

This role will no doubt challenge and develop you – it is certainly a role that will really supercharge your career

If this is a role that excites you – please apply!
