

Arboricultural Consultant £25,000-£35,000 + bonus

Home based

East Sussex, West Sussex, Kent, Surrey

This is an opportunity to join a small arboricultural practice and to make a real contribution to how it develops. Our clients include a great bunch of planning consultants, architects, Local Authorities, schools and private land owners across Kent, East Sussex, West Sussex and Surrey.

Whether you already have arboricultural consultancy experience or want to make the move across from a Local Authority, or you may be a tree contractor ready for the move, or a recent graduate just starting out, the most important thing is your potential and your commitment to producing high quality surveys and reports and your interest in working in a fast paced, commercial environment.

Ideally you will be Chartered or be willing to work towards Chartered status – a training budget, mentoring and professional subscriptions will be provided. Some CAD experience would be great, but if this is new to you, full training will be given.

Flexible working available, full or part time applicants welcomed. Home based, but with regular meet ups and joint survey days/work days.

Please send your CV to Abi at abi@statrees.com and/or call on 01424 533216. Looking forward to hearing from you and exploring this opportunity. More information at www.statrees.com.
